# Modeling and Analysis of Real-Time and Embedded Systems with UML and MARTE: Developing Cyber-Physical Systems (The MK/OMG Press)

*Bran Selic, Sébastien Gérard*

**Modeling and Analysis of Real-Time and Embedded Systems with UML and MARTE: Developing Cyber-Physical Systems (The MK/OMG Press)** Bran Selic, Sébastien Gérard

*Modeling and Analysis of Real-Time and Embedded Systems with UML and MARTE* explains how to apply the complex MARTE standard in practical situations. This approachable reference provides a handy user guide, illustrating with numerous examples how you can use MARTE to design and develop real-time and embedded systems and software.

Expert co-authors Bran Selic and Sébastien Gérard lead the team that drafted and maintain the standard and give you the tools you need apply MARTE to overcome the limitations of cyber-physical systems. The functional sophistication required of modern cyber-physical systems has reached a point where traditional code-centric development methods are proving less and less capable of delivering a reliable product in a timely manner. In *Modeling and Analysis of Real-Time and Embedded Systems with UML and MARTE*, you will learn how to take advantage of modern model-based engineering methods and corresponding industry standards to overcome these limitations. These methods take full advantage of computer-supported automation allowing timely detection of design flaws to reduce engineering risk, leading thereby to better overall product quality and greater productivity.

- Understand the design rationale behind the MARTE standard needed to take full advantage of its many powerful modeling capabilities
- Best apply the various MARTE features for the most common use cases encountered in the design of real-time and embedded software
- Learn how MARTE can be used together with the SysML language for the design of complex cyber-physical systems
- Discover how MARTE can be used for different kinds of computer-supported engineering analyses to predict key system characteristics early in development
- Customize MARTE for a specific domain or project

### **From reader reviews:**

#### **Rolanda Parker:**

The experience that you get from Modeling and Analysis of Real-Time and Embedded Systems with UML and MARTE: Developing Cyber-Physical Systems (The MK/OMG Press) is a more deep you digging the information that hide inside the words the more you get serious about reading it. It doesn't mean that this book is hard to know but Modeling and Analysis of Real-Time and Embedded Systems with UML and MARTE: Developing Cyber-Physical Systems (The MK/OMG Press) giving you excitement feeling of reading. The copy writer conveys their point in certain way that can be understood by means of anyone who read the item because the author of this book is well-known enough. This particular book also makes your vocabulary increase well. That makes it easy to understand then can go to you, both in printed or e-book style are available. We advise you for having this specific Modeling and Analysis of Real-Time and Embedded Systems with UML and MARTE: Developing Cyber-Physical Systems (The MK/OMG Press) instantly.

#### **Tracy Lindsey:**

Do you have something that that suits you such as book? The publication lovers usually prefer to choose book like comic, quick story and the biggest the first is novel. Now, why not trying Modeling and Analysis of Real-Time and Embedded Systems with UML and MARTE: Developing Cyber-Physical Systems (The MK/OMG Press) that give your pleasure preference will be satisfied by means of reading this book. Reading addiction all over the world can be said as the method for people to know world better then how they react towards the world. It can't be stated constantly that reading practice only for the geeky man but for all of you who wants to become success person. So , for every you who want to start reading as your good habit, you can pick Modeling and Analysis of Real-Time and Embedded Systems with UML and MARTE: Developing Cyber-Physical Systems (The MK/OMG Press) become your own personal starter.

#### **Matthew Hansen:**

In this period of time globalization it is important to someone to find information. The information will make anyone to understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of references to get information example: internet, magazine, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. The particular book that recommended to you is Modeling and Analysis of Real-Time and Embedded Systems with UML and MARTE: Developing Cyber-Physical Systems (The MK/OMG Press) this e-book consist a lot of the information in the condition of this world now. This particular book was represented how do the world has grown up. The language styles that writer value to explain it is easy to understand. The writer made some analysis when he makes this book. That is why this book acceptable all of you.

**Eun Christensen:**

What is your hobby? Have you heard that question when you got scholars? We believe that that issue was given by teacher on their students. Many kinds of hobby, All people has different hobby. And also you know that little person like reading or as reading through become their hobby. You need to know that reading is very important and also book as to be the factor. Book is important thing to incorporate you knowledge, except your own teacher or lecturer. You get good news or update about something by book. Amount types of books that can you choose to adopt be your object. One of them are these claims Modeling and Analysis of Real-Time and Embedded Systems with UML and MARTE: Developing Cyber-Physical Systems (The MK/OMG Press).
