Quantitative and Statistical Research Methods: From Hypothesis to Results (Research Methods for the Social Sciences) William E. Martin, Krista D. Bridgmon

Quantitative and Statistical Research Methods

This user-friendly textbook teaches students to understand and apply procedural steps in completing quantitative studies. It explains statistics while progressing through the steps of the hypothesis-testing process from hypothesis to results. The research problems used in the book reflect statistical applications related to interesting and important topics. In addition, the book provides a Research Analysis and Interpretation Guide to help students analyze research articles.

Designed as a hands-on resource, each chapter covers a single research problem and offers directions for implementing the research method from start to finish. Readers will learn how to:

- Pinpoint research questions and hypotheses
- Identify, classify, and operationally define the study variables
- Choose appropriate research designs
- Conduct power analysis
- Select an appropriate statistic for the problem
- Use a data set
- Conduct data screening and analyses using SPSS
- Interpret the statistics
- Write the results related to the problem

Quantitative and Statistical Research Methods allows students to immediately, independently, and successfully apply quantitative methods to their own research projects.

From reader reviews:

Abram Huffman:

Information is provisions for people to get better life, information today can get by anyone at everywhere. The information can be a know-how or any news even a huge concern. What people must be consider any time those information which is inside former life are challenging be find than now could be taking seriously which one would work to believe or which one often the resource are convinced. If you find the unstable resource then you get it as your main information you will have huge disadvantage for you. All those possibilities will not happen in you if you take Quantitative and Statistical Research Methods: From Hypothesis to Results (Research Methods for the Social Sciences) as your daily resource information.

James Drennan:

Why? Because this Quantitative and Statistical Research Methods: From Hypothesis to Results (Research Methods for the Social Sciences) is an unordinary book that the inside of the guide waiting for you to snap that but latter it will jolt you with the secret the item inside. Reading this book next to it was fantastic author who else write the book in such incredible way makes the content inside of easier to understand, entertaining means but still convey the meaning fully. So , it is good for you because of not hesitating having this ever again or you going to regret it. This book will give you a lot of benefits than the other book get such as help improving your ability and your critical thinking approach. So , still want to postpone having that book? If I were being you I will go to the publication store hurriedly.

Tony Partee:

Reading can called imagination hangout, why? Because while you are reading a book specifically book entitled Quantitative and Statistical Research Methods: From Hypothesis to Results (Research Methods for the Social Sciences) your mind will drift away trough every dimension, wandering in every single aspect that maybe unfamiliar for but surely will end up your mind friends. Imaging each and every word written in a guide then become one application form conclusion and explanation in which maybe you never get prior to. The Quantitative and Statistical Research Methods: From Hypothesis to Results (Research Methods for the Social Sciences) giving you an additional experience more than blown away your head but also giving you useful data for your better life in this particular era. So now let us demonstrate the relaxing pattern the following is your body and mind will likely be pleased when you are finished studying it, like winning an activity. Do you want to try this extraordinary wasting spare time activity?

Jose Brown:

As a university student exactly feel bored to help reading. If their teacher questioned them to go to the library or make summary for some reserve, they are complained. Just tiny students that has reading's soul or real their hobby. They just do what the professor want, like asked to go to the library. They go to right now there but nothing reading very seriously. Any students feel that examining is not important, boring along with can't

see colorful photos on there. Yeah, it is to become complicated. Book is very important for you. As we know that on this time, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. So , this Quantitative and Statistical Research Methods: From Hypothesis to Results (Research Methods for the Social Sciences) can make you truly feel more interested to read.
