## Science without Laws: Model Systems, Cases, Exemplary Narratives (Science and Cultural Theory)

Physicists regularly invoke universal laws, such as those of motion and electromagnetism, to explain events. Biological and medical scientists have no such laws. How then do they acquire a reliable body of knowledge about biological organisms and human disease? One way is by repeatedly returning to, manipulating, observing, interpreting, and reinterpreting certain subjects—such as flies, mice, worms, or microbes—or, as they are known in biology, “model systems.” Across the natural and social sciences, other disciplinary fields have developed canonical examples that have played a role comparable to that of biology’s model systems, serving not only as points of reference and illustrations of general principles or values but also as sites of continued investigation and reinterpretation. The essays in this collection assess the scope and function of model objects in domains as diverse as biology, geology, and history, attending to differences between fields as well as to epistemological commonalities.

Contributors examine the role of the fruit fly *Drosophila* and nematode worms in biology, troops of baboons in primatology, box and digital simulations of the movement of the earth’s crust in geology, and meteorological models in climatology. They analyze the intensive study of the prisoner’s dilemma in game theory, ritual in anthropology, the individual case in psychoanalytic research, and Athenian democracy in political theory. The contributors illuminate the processes through which particular organisms, cases, materials, or narratives become foundational to their fields, and they examine how these foundational exemplars—from the fruit fly to Freud’s Dora—shape the knowledge produced within their disciplines.

### **From reader reviews:**

#### **Kevin House:**

Within other case, little men and women like to read book Science without Laws: Model Systems, Cases, Exemplary Narratives (Science and Cultural Theory). You can choose the best book if you'd prefer reading a book. As long as we know about how is important a book Science without Laws: Model Systems, Cases, Exemplary Narratives (Science and Cultural Theory). You can add information and of course you can around the world with a book. Absolutely right, since from book you can know everything! From your country until finally foreign or abroad you will end up known. About simple factor until wonderful thing you can know that. In this era, we can easily open a book or searching by internet unit. It is called e-book. You should use it when you feel bored to go to the library. Let's go through.

#### **Linda Long:**

As people who live in the actual modest era should be revise about what going on or info even knowledge to make them keep up with the era and that is always change and move ahead. Some of you maybe may update themselves by reading books. It is a good choice in your case but the problems coming to a person is you don't know which you should start with. This Science without Laws: Model Systems, Cases, Exemplary Narratives (Science and Cultural Theory) is our recommendation to make you keep up with the world. Why, as this book serves what you want and need in this era.

#### **Lucas Florio:**

This Science without Laws: Model Systems, Cases, Exemplary Narratives (Science and Cultural Theory) are usually reliable for you who want to become a successful person, why. The reason why of this Science without Laws: Model Systems, Cases, Exemplary Narratives (Science and Cultural Theory) can be among the great books you must have is actually giving you more than just simple studying food but feed you with information that might be will shock your prior knowledge. This book is usually handy, you can bring it just about everywhere and whenever your conditions both in e-book and printed versions. Beside that this Science without Laws: Model Systems, Cases, Exemplary Narratives (Science and Cultural Theory) forcing you to have an enormous of experience for example rich vocabulary, giving you demo of critical thinking that we all know it useful in your day pastime. So , let's have it appreciate reading.

#### **Clark Abeyta:**

A lot of publication has printed but it is unique. You can get it by online on social media. You can choose the most effective book for you, science, comedian, novel, or whatever by means of searching from it. It is identified as of book Science without Laws: Model Systems, Cases, Exemplary Narratives (Science and Cultural Theory). You can include your knowledge by it. Without departing the printed book, it can add your knowledge and make you happier to read. It is most essential that, you must aware about reserve. It can bring you from one location to other place.
