Applied Scanning Probe Methods VI: v. 6 (NanoScience and Technology)

Bharat Bhushan, Satoshi Kawata

Applied Scanning Probe Methods VI: v. 6 (NanoScience and Technology) Bharat Bhushan, Satoshi Kawata

The volumes V, VI and VII examine the physical and technical foundation for recent progress in applied scanning probe techniques. The first volume came out in January 2004 and the second to fourth volumes in early 2006. The field is progressing so fast that there is a need for a set of volumes every 12 to 18 months to capture latest developments. These volumes constitute a timely comprehensive overview of SPM applications. After introducing scanning probe microscopy, including sensor technology and tip characterization, chapters on use in various industrial applications are presented. Industrial applications span topographic and dynamical surface studies of thin-film semiconductors, polymers, paper, ceramics, and magnetic and biological materials. The chapters have been written by leading researchers and application scientists from all over the world and from various industries to provide a broader perspective.

From reader reviews:

Eula Hunter:

Have you spare time for any day? What do you do when you have a lot more or little spare time? Sure, you can choose the suitable activity for spend your time. Any person spent their very own spare time to take a stroll, shopping, or went to often the Mall. How about open or even read a book eligible Applied Scanning Probe Methods VI: v. 6 (NanoScience and Technology)? Maybe it is being best activity for you. You already know beside you can spend your time with the favorite's book, you can smarter than before. Do you agree with the opinion or you have different opinion?

Ricky Burnham:

The book Applied Scanning Probe Methods VI: v. 6 (NanoScience and Technology) can give more knowledge and also the precise product information about everything you want. Why must we leave the great thing like a book Applied Scanning Probe Methods VI: v. 6 (NanoScience and Technology)? A number of you have a different opinion about book. But one aim in which book can give many details for us. It is absolutely appropriate. Right now, try to closer with your book. Knowledge or info that you take for that, you are able to give for each other; you could share all of these. Book Applied Scanning Probe Methods VI: v. 6 (NanoScience and Technology) has simple shape but you know: it has great and massive function for you. You can search the enormous world by available and read a book. So it is very wonderful.

Amado Spieker:

Is it a person who having spare time after that spend it whole day by simply watching television programs or just resting on the bed? Do you need something new? This Applied Scanning Probe Methods VI: v. 6 (NanoScience and Technology) can be the solution, oh how comes? It's a book you know. You are thus out of date, spending your time by reading in this brand new era is common not a geek activity. So what these publications have than the others?

Michael Larose:

Some people said that they feel bored when they reading a book. They are directly felt the idea when they get a half parts of the book. You can choose typically the book Applied Scanning Probe Methods VI: v. 6 (NanoScience and Technology) to make your own reading is interesting. Your own skill of reading skill is developing when you such as reading. Try to choose simple book to make you enjoy to see it and mingle the sensation about book and looking at especially. It is to be 1st opinion for you to like to wide open a book and go through it. Beside that the book Applied Scanning Probe Methods VI: v. 6 (NanoScience and Technology) can to be your friend when you're really feel alone and confuse using what must you're doing of that time.
