Building a Quadcopter with Arduino

Vasilis Tzivaras

Building a Quadcopter with Arduino Vasilis Tzivaras

Key Features

- Grasp the knowledge required to assemble your drone with light and cost effective materials
- Enlighten your understanding about the flight by performing step-by-step pre-flight adjustments and acquiring the instructions for a safe flight
- Get the best tips to deal with performance issues related to your quadcopter

Book Description

Quadcopters, also known as quadrotors, are gaining more and more popularity in today's world. With the help of these devices, anyone can have an “eye in the sky” and can monitor any place at any time. You can capture photographs and once a while and perform automated tasks. In this book, you will be informed about all the basic modules and electronics needed to fly a simple quadcopter. You'll delve deep to create a fully-functional quadcopter quickly with the help of Arduino boards. Through this book, you'll develop the skills needed to build a DIY drone that can capture pictures and record videos.

What you will learn

- Review and choose the most suitable material for the build
- Set up and calibrate all of your electronic parts
- Control and fly your quadcopter taking into account the weather conditions
- Maintain your vehicle as much as possible and repair it whenever required
- Engineer the structure of your vehicle
- Develop a flight controller with its basic principles
- Eliminate possible malfunctions in the future
- Repair your drone if it crashes or faces any damage

About the Author

Vasilis Tzivaras is a software developer and hardware engineer who lives in Ioannina, Greece. He is currently an undergraduate student of the Department of computer science and Engineering at Ioannina. Alongside his studies, he is working on many projects relevant to robotics, such as drones, home automation, and smart home systems using Arduino and the Raspberry Pi. Furthermore, he is enthusiastic about clean energy solutions and cultural innovation ideas.

He has worked for the University Hospital of Ioannina as an assistant for various computer issues, and he has been part of the support team of his CSE department for over a year. He has participated in IEEE UOI Student Branch and other big organizations, such as FOSSCOMM, with personal presentations for website designing, programming, Linux systems, and drones.

As a member of IEEE University of Ioannina Student Branch, he has proposed many projects and solutions to automate homes and many other life problems by reducing the time of everyday routines. In addition to this, he has come up with ideas to entertain kids with funny and magical projects using Arduino-like hardware and open source software. Many of the projects can be found at his GitHub account under the name

of BillyTziv.

Apart from this book, he has also worked on another book Programming in C, which is not yet published. In addition to this, he has written for blogs, forums, guides, and small chapters, explaining and sharing his knowledge of computers, networks, and programming.

Table of Contents

1. Introduction to Quadcopters
2. Hardware Overview
3. Creating a Frame
4. Soldering the Electronics
5. Electronics Installation
6. Flight Controller Setup
7. Flight Instructions
8. Cameras and Extra Functions
9. Repair and Maintenance

From reader reviews:

Dora Campfield:

Book is definitely written, printed, or descriptive for everything. You can realize everything you want by a publication. Book has a different type. As you may know that book is important matter to bring us around the world. Beside that you can your reading talent was fluently. A publication Building a Quadcopter with Arduino will make you to always be smarter. You can feel a lot more confidence if you can know about almost everything. But some of you think that will open or reading some sort of book make you bored. It isn't make you fun. Why they may be thought like that? Have you looking for best book or suited book with you?

Mark Spears:

Do you certainly one of people who can't read pleasurable if the sentence chained inside the straightway, hold on guys this kind of aren't like that. This Building a Quadcopter with Arduino book is readable by means of you who hate the perfect word style. You will find the info here are arrange for enjoyable looking at experience without leaving even decrease the knowledge that want to supply to you. The writer involving Building a Quadcopter with Arduino content conveys the idea easily to understand by many individuals. The printed and e-book are not different in the content material but it just different as it. So , do you continue to thinking Building a Quadcopter with Arduino is not loveable to be your top collection reading book?

Barbara Corbin:

Nowadays reading books be than want or need but also work as a life style. This reading routine give you lot of advantages. Associate programs you got of course the knowledge the rest of the information inside the book this improve your knowledge and information. The data you get based on what kind of book you read, if you want attract knowledge just go with schooling books but if you want experience happy read one using theme for entertaining including comic or novel. Often the Building a Quadcopter with Arduino is kind of guide which is giving the reader capricious experience.

Quincy Nelson:

People live in this new moment of lifestyle always try to and must have the spare time or they will get great deal of stress from both daily life and work. So , once we ask do people have extra time, we will say absolutely indeed. People is human not really a huge robot. Then we request again, what kind of activity do you possess when the spare time coming to you of course your answer will certainly unlimited right. Then do you ever try this one, reading ebooks. It can be your alternative throughout spending your spare time, the book you have read is usually Building a Quadcopter with Arduino.
