Modelling Goods Trains, Goods Sheds and Yards in the Steam Era

Terry Booker

Modelling Goods Trains, Goods Sheds and Yards in the Steam Era Terry Booker

This comprehensive book, written by an experienced railway modeller, demonstrates how, with a little patience, you can produce accurate and realistic models of goods trains, sheds and yards. It presents detailed step-by-step projects and covers basic card-kit building, 'kit bashing' and scratch building. Written in an easily understandable style, this fascinating work is aimed at all those railway modellers who wish to authentically replicate the way goods were moved and handled on Britain's railways during the steam era. It covers the simple tools and materials that are required and is packed with information about steam-era goods workings and how to recreate them on a layout. It shows the reader how a typical goods yard operated and how it was constructed, and demonstrates how to detail, improve, modify and achieve the best results from card kits. It also examines the growing appeal of 'download' kits and shows the modeller how to improve the appearance and reliability of goods rolling stock. With many money-saving suggestions, this essential guide to transforming shiny shop-bought models and kits into convincing representations of the real thing will be invaluable to all railway modellers. Fully illustrated with 245 colour and black & white photographs.
