Measurement and Instrumentation: Theory and Application Alan S Morris, Reza Langari

Measurement and Instrumentation introduces undergraduate engineering students to the measurement principles and the range of sensors and instruments that are used for measuring physical variables. Based on Morris's *Measurement and Instrumentation Principles*, this brand new text has been fully updated with coverage of the latest developments in such measurement technologies as smart sensors, intelligent instruments, microsensors, digital recorders and displays and interfaces. Clearly and comprehensively written, this textbook provides students with the knowledge and tools, including examples in LABVIEW, to design and build measurement systems for virtually any engineering application. The text features chapters on data acquisition and signal processing with LabVIEW from Dr. Reza Langari, Professor of Mechanical Engineering at Texas A&M University.

- Early coverage of measurement system design provides students with a better framework for understanding the importance of studying measurement and instrumentation
- Includes significant material on data acquisition, coverage of sampling theory and linkage to acquisition/processing software, providing students with a more modern approach to the subject matter, in line with actual data acquisition and instrumentation techniques now used in industry.
- Extensive coverage of uncertainty (inaccuracy) aids students' ability to determine the precision of instruments
- Integrated use of LabVIEW examples and problems enhances students' ability to understand and retain content

From reader reviews:

David Pimentel:

Have you spare time for a day? What do you do when you have considerably more or little spare time? Yeah, you can choose the suitable activity for spend your time. Any person spent their particular spare time to take a go walking, shopping, or went to the particular Mall. How about open or read a book titled Measurement and Instrumentation: Theory and Application? Maybe it is to get best activity for you. You already know beside you can spend your time with your favorite's book, you can better than before. Do you agree with it is opinion or you have some other opinion?

Paul Tirrell:

What do you with regards to book? It is not important along? Or just adding material when you really need something to explain what the ones you have problem? How about your free time? Or are you busy person? If you don't have spare time to do others business, it is make one feel bored faster. And you have extra time? What did you do? All people has many questions above. They need to answer that question mainly because just their can do in which. It said that about guide. Book is familiar on every person. Yes, it is right. Because start from on guardería until university need that Measurement and Instrumentation: Theory and Application to read.

Mae Bushee:

The guide with title Measurement and Instrumentation: Theory and Application has lot of information that you can study it. You can get a lot of gain after read this book. This kind of book exist new expertise the information that exist in this book represented the condition of the world currently. That is important to yo7u to learn how the improvement of the world. This specific book will bring you within new era of the glowbal growth. You can read the e-book in your smart phone, so you can read it anywhere you want.

Harvey Lee:

Don't be worry if you are afraid that this book may filled the space in your house, you can have it in e-book technique, more simple and reachable. This particular Measurement and Instrumentation: Theory and Application can give you a lot of pals because by you taking a look at this one book you have thing that they don't and make you actually more like an interesting person. This kind of book can be one of a step for you to get success. This book offer you information that perhaps your friend doesn't know, by knowing more than other make you to be great folks. So , why hesitate? We should have Measurement and Instrumentation: Theory and Application.
