## Metal Chalcogenide Nanostructures for Renewable Energy Applications

This first ever reference book that focuses on metal chalcogenide semiconductor nanostructures for renewable energy applications encapsulates the state-of-the-art in multidisciplinary research on the metal chalcogenide semiconductor nanostructures (nanocrystals, nanoparticles, nanorods, nanowires, nanobelts, nanoflowers, nanoribbons and more).

The properties and synthesis of a class of nanomaterials is essential to renewable energy manufacturing and this book focuses on the synthesis of metal chalcogenide nanostructures, their growth mechanism, optical, electrical, and other important properties and their applications in different diverging fields like photovoltaics, hydrogen production, thermoelectrics, lithium battery, energy storage, photocatalysis, sensors.

An important reference source for students, scientists, engineers, researchers and industrialists working on nanomaterials-based energy aspects associated with chemistry, physics, materials science, electrical engineering, energy science and technology, and environmental science.

### **From reader reviews:**

#### **Louise Hacker:**

Do you have favorite book? When you have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each publication has different aim or perhaps goal; it means that guide has different type. Some people experience enjoy to spend their the perfect time to read a book. They can be reading whatever they have because their hobby is reading a book. Think about the person who don't like studying a book? Sometime, particular person feel need book whenever they found difficult problem or maybe exercise. Well, probably you should have this Metal Chalcogenide Nanostructures for Renewable Energy Applications.

#### **Theresa Adams:**

Information is provisions for anyone to get better life, information presently can get by anyone in everywhere. The information can be a information or any news even a problem. What people must be consider whenever those information which is from the former life are difficult to be find than now's taking seriously which one would work to believe or which one the resource are convinced. If you obtain the unstable resource then you buy it as your main information there will be huge disadvantage for you. All those possibilities will not happen within you if you take Metal Chalcogenide Nanostructures for Renewable Energy Applications as your daily resource information.

#### **Nellie Nelson:**

Playing with family inside a park, coming to see the sea world or hanging out with pals is thing that usually you will have done when you have spare time, subsequently why you don't try issue that really opposite from that. Just one activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition associated with. Even you love Metal Chalcogenide Nanostructures for Renewable Energy Applications, you could enjoy both. It is great combination right, you still desire to miss it? What kind of hang-out type is it? Oh can occur its mind hangout people. What? Still don't get it, oh come on its named reading friends.

#### **April Harry:**

A number of people said that they feel bored stiff when they reading a publication. They are directly felt it when they get a half portions of the book. You can choose the actual book Metal Chalcogenide Nanostructures for Renewable Energy Applications to make your own personal reading is interesting. Your skill of reading expertise is developing when you similar to reading. Try to choose easy book to make you enjoy to see it and mingle the impression about book and reading especially. It is to be first opinion for you to like to wide open a book and examine it. Beside that the book Metal Chalcogenide Nanostructures for Renewable Energy Applications can to be your brand new friend when you're truly feel alone and confuse using what must you're doing of this time.
