Remote Sensing in Archaeology (Interdisciplinary Contributions to Archaeology)

Remote Sensing in Archaeology (Interdisciplinary Contributions to Archaeology)

Archaeology has been transformed by technology that allows one to 'see' below the surface of the earth. This work illustrates the uses of advanced technology in archaeological investigation. It deals with hand-held instruments that probe the subsurface of the earth to unveil layering and associated sites; underwater exploration and photography of submerged sites and artifacts; and the utilization of imaging from aircraft and spacecraft to reveal the regional setting of archaeological sites and to assist in cultural resource management.
