What will be the greatest moral challenge facing our society throughout this century?

Are we *ready* to face it?

Editors Charles W. Colson and Nigel M. de S. Cameron, along with a panel of expert contributors, make the case in this book that the greatest watershed debates of the twenty-first century concerning ethics and public policy will surround the issue of biotechnology. In twelve essays they address several of the legal and ethical challenges before us: embryo research, stem cell research, cloning, genetic engineering, gene therapy, pharmacogenomics, cybernetics, nanotechnology and, of course, abortion.

Contributors include
