Invasive Species: Vectors and Management Strategies

Invasive Species: Vectors and Management Strategies

Recent years have seen a steep rise in invasions of non-native species in virtually all major ecoregions on Earth. Along with this rise has come a realization that a rigorous scientific understanding of why, how, when, and where species are transported is the necessary foundation for managing biological invasions.

Invasive Species presents extensive information and new analyses on mechanisms of species transfer, or vectors, as the latest contribution from the Global Invasive Species Programme (GISP). Contributors assess invasion vectors and vector management in terrestrial, freshwater, and marine ecosystems for major taxonomic groups in a variety of regions around the world. The book:

- examines invasion causes, routes, and vectors in space and time
- highlights current approaches and challenges to preventing new invasions, both from a geographic and taxonomic point of view
- explores strategies, benefits, and limitations of risk assessment
- offers a synthesis of many facets of vector science and management
- presents recommendations for action

Chapter authors review fungi, plants, invertebrates, and vertebrates, with geographic assessments covering New Zealand, Australia, South Africa, and the United States.

Although the full extent and cumulative impact of nonnative species can only be approximated, biological invasions are clearly a potent force of global change, contributing to a wide range of deleterious effects including disease outbreaks, habitat alteration and loss, declines of native species, increased frequency of fires, and shifts in nutrient cycling. Vectors are the delivery mechanisms, resulting in recent increases in rates of new invasions. *Invasive Species* brings together in a single volume new information from leading scientists around the world on approaches to controlling and managing invasion vectors. This volume is a timely and essential reference for scientists, researchers, policymakers, and anyone concerned with understanding biological invasions and developing effective responses to them.

From reader reviews:

Leslie Jasso:

What do you think about book? It is just for students since they're still students or the idea for all people in the world, the particular best subject for that? Just you can be answered for that question above. Every person has diverse personality and hobby for each other. Don't to be pressured someone or something that they don't need do that. You must know how great along with important the book Invasive Species: Vectors and Management Strategies. All type of book is it possible to see on many options. You can look for the internet methods or other social media.

Robert Ryan:

A lot of people always spent their free time to vacation or maybe go to the outside with them family members or their friend. Did you know? Many a lot of people spent these people free time just watching TV, or perhaps playing video games all day long. If you would like try to find a new activity this is look different you can read a new book. It is really fun in your case. If you enjoy the book that you simply read you can spent 24 hours a day to reading a e-book. The book Invasive Species: Vectors and Management Strategies it is extremely good to read. There are a lot of people who recommended this book. These folks were enjoying reading this book. When you did not have enough space to deliver this book you can buy the actual e-book. You can m0ore easily to read this book out of your smart phone. The price is not too expensive but this book features high quality.

Rick Fountain:

Reading can called mind hangout, why? Because while you are reading a book especially book entitled Invasive Species: Vectors and Management Strategies your head will drift away trough every dimension, wandering in every single aspect that maybe mysterious for but surely can be your mind friends. Imaging every word written in a guide then become one web form conclusion and explanation that will maybe you never get prior to. The Invasive Species: Vectors and Management Strategies giving you another experience more than blown away the mind but also giving you useful data for your better life in this era. So now let us teach you the relaxing pattern this is your body and mind will be pleased when you are finished looking at it, like winning a. Do you want to try this extraordinary shelling out spare time activity?

Madeline Cecil:

You may get this Invasive Species: Vectors and Management Strategies by browse the bookstore or Mall. Simply viewing or reviewing it could to be your solve trouble if you get difficulties to your knowledge. Kinds of this book are various. Not only by written or printed but in addition can you enjoy this book through e-book. In the modern era similar to now, you just looking of your mobile phone and searching what your problem. Right now, choose your own personal ways to get more information about your reserve. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose suitable ways for you.
