Antitrust Law, Interpretation and Implementation (University Casebook Series)

Charles Goetz, Fred McChesney, Thomas Lambert

Antitrust Law, Interpretation and Implementation (University Casebook Series) Charles Goetz, Fred McChesney, Thomas Lambert

The new edition of the casebook, which welcomes Thomas A. Lambert as a co-author, remains true to its original goals, in that it:

- focuses more than other texts on lower-court interpretations and application of antitrust principles, minimizing the importance of older “classic cases” from the Supreme Court except to the extent they influence antitrust today
- makes use of materials from actual cases and real-life situations, materials such as complaints, expert reports, pleadings and jury instructions
- exposes the sorts of problems encountered (indeed, sometimes created) by lawyers who do not necessarily specialize in antitrust, but work in contract-related areas where antitrust concerns must be part of the attorney’s planning and drafting
- emphasizes that modern antitrust continues to evolve as a branch of applied microeconomics, but also that the learning required to be economically literate is neither as complicated nor as lengthy as presented in other texts
- is geared for a one-semester course by presenting the antitrust basics in an economical way, omitting material that pads many other texts but which an instructor typically will not have time to cover
- makes available to instructors adopting the text a large set of visual-aid slides prepared specially for this book.
