Geomorphic Analysis of River Systems: An Approach to Reading the Landscape

Kirstie A. Fryirs, Gary J. Brierley

Geomorphic Analysis of River Systems: An Approach to Reading the Landscape Kirstie A. Fryirs, Gary J. Brierley

Filling a niche in the geomorphology teaching market, this introductory book is built around a 12 week course in fluvial geomorphology.

‘Reading the landscape’ entails making sense of what a riverscape looks like, how it works, how it has evolved over time, and how alterations to one part of a catchment may have secondary consequences elsewhere, over different timeframes. These place-based field analyses are framed within their topographic, climatic and environmental context. Issues and principles presented in the first part of this book provide foundational understandings that underpin the approach to reading the landscape that is presented in the second half of the book. In reading the landscape, detective-style investigations and interpretations are tied to theoretical and conceptual principles to generate catchment-specific analyses of river character, behaviour and evolution, including responses to human disturbance.

This book has been constructed as an introductory text on river landscapes, providing a bridge and/or companion to quantitatively-framed or modelled approaches to landscape analysis that are addressed elsewhere. Key principles outlined in the book emphasise the importance of complexity, contingency and emergence in interpreting the character, behaviour and evolution of any given system.

The target audience is second and third year undergraduate students in geomorphology, hydrology, earth science and environmental science, as well as river practitioners who use geomorphic understandings to guide scientific and/or management applications.

The primary focus of Kirstie and Gary’s research and teaching entails the use of geomorphic principles as a tool with which to develop coherent scientific understandings of river systems, and the application of these understandings in management practice. Kirstie and Gary are co-developers of the River Styles® Framework and Short Course that is widely used in river management, decision-making and training.

From reader reviews:

Robert Aviles:

Book is actually written, printed, or created for everything. You can learn everything you want by a reserve. Book has a different type. As you may know that book is important issue to bring us around the world. Adjacent to that you can your reading skill was fluently. A e-book Geomorphic Analysis of River Systems: An Approach to Reading the Landscape will make you to possibly be smarter. You can feel far more confidence if you can know about almost everything. But some of you think which open or reading the book make you bored. It is far from make you fun. Why they might be thought like that? Have you in search of best book or suitable book with you?

William Perrotta:

Do you certainly one of people who can't read pleasurable if the sentence chained in the straightway, hold on guys this kind of aren't like that. This Geomorphic Analysis of River Systems: An Approach to Reading the Landscape book is readable by means of you who hate the straight word style. You will find the information here are arrange for enjoyable studying experience without leaving possibly decrease the knowledge that want to give to you. The writer associated with Geomorphic Analysis of River Systems: An Approach to Reading the Landscape content conveys prospect easily to understand by a lot of people. The printed and e-book are not different in the information but it just different in the form of it. So , do you continue to thinking Geomorphic Analysis of River Systems: An Approach to Reading the Landscape is not loveable to be your top collection reading book?

Richard Osteen:

People live in this new moment of lifestyle always aim to and must have the free time or they will get great deal of stress from both way of life and work. So , when we ask do people have free time, we will say absolutely sure. People is human not a robot. Then we inquire again, what kind of activity are there when the spare time coming to you actually of course your answer will unlimited right. Then do you try this one, reading textbooks. It can be your alternative within spending your spare time, often the book you have read is actually Geomorphic Analysis of River Systems: An Approach to Reading the Landscape.

Carl Johnson:

Is it an individual who having spare time after that spend it whole day through watching television programs or just resting on the bed? Do you need something totally new? This Geomorphic Analysis of River Systems: An Approach to Reading the Landscape can be the respond to, oh how comes? A fresh book you know. You are consequently out of date, spending your spare time by reading in this new era is common not a nerd activity. So what these guides have than the others?
