Information Sharing on the Semantic Web (Advanced Information and Knowledge Processing)

Heiner Stuckenschmidt, Frank van Harmelen

Information Sharing on the Semantic Web (Advanced Information and Knowledge Processing) Heiner Stuckenschmidt, Frank van Harmelen

The large-scale and almost ubiquitous availability of information has become as much of a curse as it is a blessing. The more information is available, the harder it is to locate any particular piece of it. And even when it has been successfully found, it is even harder still to usefully combine it with other information we may already possess. This problem occurs at many different levels, ranging from the overcrowded disks of our own PCs to the mass of unstructured information on the World Wide Web. It is commonly understood that this problem of information sharing can only be solved by giving computers better access to the semantics of the information. While it has been recognized that ontologies play a crucial role in solving the open problems, most approaches rely on the existence of well-established data structures. To overcome these shortcomings, Stuckenschmidt and van Harmelen describe ontology-based approaches for resolving semantic heterogeneity in weakly structured environments, in particular the World Wide Web. Addressing problems like missing conceptual models, unclear system boundaries, and heterogeneous representations, they design a framework for ontology-based information sharing in weakly structured environments like the Semantic Web. For researchers and students in areas related to the Semantic Web, the authors provide not only a comprehensive overview of the State of the art, but also present in detail recent research in areas like ontology design for information integration, metadata generation and management, and representation and management of distributed ontologies. For professionals in areas such as e-commerce (e.g., the exchange of product knowledge) and knowledge management (e.g., in large and distributed organizations), the book provides decision support on the use of novel technologies, information about potential problems, and guidelines for the successful application of existing technologies.

From reader reviews:

Mary Ybarra:

Book is to be different for every single grade. Book for children right up until adult are different content. As you may know that book is very important normally. The book Information Sharing on the Semantic Web (Advanced Information and Knowledge Processing) seemed to be making you to know about other expertise and of course you can take more information. It is rather advantages for you. The publication Information Sharing on the Semantic Web (Advanced Information and Knowledge Processing) is not only giving you much more new information but also being your friend when you truly feel bored. You can spend your spend time to read your book. Try to make relationship with the book Information Sharing on the Semantic Web (Advanced Information and Knowledge Processing). You never really feel lose out for everything in case you read some books.

William Murphy:

Now a day individuals who Living in the era exactly where everything reachable by match the internet and the resources in it can be true or not call for people to be aware of each facts they get. How a lot more to be smart in obtaining any information nowadays? Of course the solution is reading a book. Examining a book can help men and women out of this uncertainty Information particularly this Information Sharing on the Semantic Web (Advanced Information and Knowledge Processing) book because book offers you rich info and knowledge. Of course the information in this book hundred % guarantees there is no doubt in it as you know.

Erica Dennis:

Nowadays reading books are more than want or need but also work as a life style. This reading addiction give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book that improve your knowledge and information. The info you get based on what kind of book you read, if you want drive more knowledge just go with education and learning books but if you want experience happy read one using theme for entertaining such as comic or novel. Typically the Information Sharing on the Semantic Web (Advanced Information and Knowledge Processing) is kind of reserve which is giving the reader unpredictable experience.

June Slater:

This Information Sharing on the Semantic Web (Advanced Information and Knowledge Processing) is great book for you because the content which can be full of information for you who always deal with world and possess to make decision every minute. This book reveal it facts accurately using great manage word or we can declare no rambling sentences inside it. So if you are read the idea hurriedly you can have whole information in it. Doesn't mean it only offers you straight forward sentences but difficult core information with wonderful delivering sentences. Having Information Sharing on the Semantic Web (Advanced

Information and Knowledge Processing) in your hand like having the world in your arm, data in it is not ridiculous one particular. We can say that no guide that offer you world throughout ten or fifteen tiny right but this book already do that. So , this is certainly good reading book. Hey there Mr. and Mrs. hectic do you still doubt in which?
