Intuitive Probability and Random Processes using MATLAB®

Steven Kay

Intuitive Probability and Random Processes using MATLAB® Steven Kay

Intuitive Probability and Random Processes using MATLAB® is an introduction to probability and random processes that merges theory with practice. Based on the author's belief that only 'hands-on' experience with the material can promote intuitive understanding, the approach is to motivate the need for theory using MATLAB examples, followed by theory and analysis, and finally descriptions of 'real-world' examples to acquaint the reader with a wide variety of applications. The latter is intended to answer the usual question 'Why do we have to study this?' Other salient features are:

*heavy reliance on computer simulation for illustration and student exercises

*the incorporation of MATLAB programs and code segments

*discussion of discrete random variables followed by continuous random variables to minimize confusion

*summary sections at the beginning of each chapter

*in-line equation explanations

*warnings on common errors and pitfalls

*over 750 problems designed to help the reader assimilate and extend the concepts

Intuitive Probability and Random Processes using MATLAB® is intended for undergraduate and first-year graduate students in engineering. The practicing engineer as well as others having the appropriate mathematical background will also benefit from this book.

About the Author

Steven M. Kay is a Professor of Electrical Engineering at the University of Rhode Island and a leading expert in signal processing. He has received the Education Award 'for outstanding contributions in education and in writing scholarly books and texts...' from the IEEE Signal Processing society and has been listed as among the 250 most cited researchers in the world in engineering.

From reader reviews:

Ila Petty:

This Intuitive Probability and Random Processes using MATLAB® book is not ordinary book, you have it then the world is in your hands. The benefit you have by reading this book is definitely information inside this book incredible fresh, you will get information which is getting deeper a person read a lot of information you will get. That Intuitive Probability and Random Processes using MATLAB® without we recognize teach the one who studying it become critical in contemplating and analyzing. Don't always be worry Intuitive Probability and Random Processes using MATLAB® can bring whenever you are and not make your bag space or bookshelves' become full because you can have it inside your lovely laptop even telephone. This Intuitive Probability and Random Processes using MATLAB® having very good arrangement in word along with layout, so you will not feel uninterested in reading.

Conrad Degregorio:

Playing with family inside a park, coming to see the water world or hanging out with pals is thing that usually you may have done when you have spare time, then why you don't try matter that really opposite from that. 1 activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Intuitive Probability and Random Processes using MATLAB®, it is possible to enjoy both. It is great combination right, you still need to miss it? What kind of hang type is it? Oh seriously its mind hangout folks. What? Still don't get it, oh come on its referred to as reading friends.

Joe Lowe:

Reading a book being new life style in this 12 months; every people loves to study a book. When you go through a book you can get a great deal of benefit. When you read books, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what forms of book that you have read. If you would like get information about your examine, you can read education books, but if you want to entertain yourself you can read a fiction books, such us novel, comics, along with soon. The Intuitive Probability and Random Processes using MATLAB® will give you new experience in studying a book.

John Harris:

Book is one of source of knowledge. We can add our know-how from it. Not only for students but native or citizen will need book to know the change information of year in order to year. As we know those ebooks have many advantages. Beside most of us add our knowledge, could also bring us to around the world. Through the book Intuitive Probability and Random Processes using MATLAB® we can take more advantage. Don't one to be creative people? To get creative person must prefer to read a book. Just simply choose the best book that acceptable with your aim. Don't always be doubt to change your life with this book

Intuitive Probability and Random Processes using MATLAB®. You can more appealing than now.
