Multiple Testing Problems in Pharmaceutical Statistics (Chapman & Hall/CRC Biostatistics Series)

Useful Statistical Approaches for Addressing Multiplicity Issues

Includes practical examples from recent trials

Bringing together leading statisticians, scientists, and clinicians from the pharmaceutical industry, academia, and regulatory agencies, **Multiple Testing Problems in Pharmaceutical Statistics** explores the rapidly growing area of multiple comparison research with an emphasis on pharmaceutical applications. In each chapter, the expert contributors describe important multiplicity problems encountered in pre-clinical and clinical trial settings.

The book begins with a broad introduction from a regulatory perspective to different types of multiplicity problems that commonly arise in confirmatory controlled clinical trials, before giving an overview of the concepts, principles, and procedures of multiple testing. It then presents statistical methods for analyzing clinical dose response studies that compare several dose levels with a control as well as statistical methods for analyzing multiple endpoints in clinical trials. After covering gatekeeping procedures for testing hierarchically ordered hypotheses, the book discusses statistical approaches for the design and analysis of adaptive designs and related confirmatory hypothesis testing problems. The final chapter focuses on the design of pharmacogenomic studies based on established statistical principles. It also describes the analysis of data collected in these studies, taking into account the numerous multiplicity issues that occur.

This volume explains how to solve critical issues in multiple testing encountered in pre-clinical and clinical trial applications. It presents the necessary statistical methodology, along with examples and software code to show how to use the methods in practice.

From reader reviews:

Jody Tolar:

This book untitled Multiple Testing Problems in Pharmaceutical Statistics (Chapman & Hall/CRC Biostatistics Series) to be one of several books which best seller in this year, that's because when you read this guide you can get a lot of benefit in it. You will easily to buy this book in the book retail store or you can order it via online. The publisher on this book sells the e-book too. It makes you quicker to read this book, as you can read this book in your Smartphone. So there is no reason to you personally to past this publication from your list.

Kevin Vargas:

Do you have something that that suits you such as book? The e-book lovers usually prefer to pick book like comic, short story and the biggest one is novel. Now, why not striving Multiple Testing Problems in Pharmaceutical Statistics (Chapman & Hall/CRC Biostatistics Series) that give your entertainment preference will be satisfied by simply reading this book. Reading habit all over the world can be said as the method for people to know world considerably better then how they react in the direction of the world. It can't be explained constantly that reading routine only for the geeky individual but for all of you who wants to become success person. So , for all you who want to start studying as your good habit, it is possible to pick Multiple Testing Problems in Pharmaceutical Statistics (Chapman & Hall/CRC Biostatistics Series) become your own personal starter.

Glenn Bail:

Don't be worry in case you are afraid that this book can filled the space in your house, you can have it in e-book approach, more simple and reachable. This kind of Multiple Testing Problems in Pharmaceutical Statistics (Chapman & Hall/CRC Biostatistics Series) can give you a lot of buddies because by you looking at this one book you have issue that they don't and make a person more like an interesting person. This particular book can be one of one step for you to get success. This guide offer you information that might be your friend doesn't understand, by knowing more than some other make you to be great folks. So , why hesitate? We need to have Multiple Testing Problems in Pharmaceutical Statistics (Chapman & Hall/CRC Biostatistics Series).

Francis Corder:

As a student exactly feel bored to help reading. If their teacher asked them to go to the library or make summary for some book, they are complained. Just minor students that has reading's spirit or real their hobby. They just do what the instructor want, like asked to go to the library. They go to there but nothing reading critically. Any students feel that examining is not important, boring and also can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's

country. Therefore this Multiple Testing Problems in Pharmaceutical Statistics (Chapman & Hall/CRC Biostatistics Series) can make you really feel more interested to read.
